Amendment to the Claims:

The listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1-9 Cancelled

10.   (currently amended) A method for displaying information on a display, said information including elements, wherein an element is either of a continuous length presenting a length which is equal to or greater than the size of said display, or a wrapped length presenting a length which is less than the size of said display, and said display is further provided with a user interface including a displayed menu structure of items displayed on said display, said method comprising the following steps:

providing in said displayed menu structure a selectable continuous length item and a wrapped length item which are chosen from the display as display options;

selecting said continuous length item or said wrapped length item in the displayed menu structure of the user interface; and

displaying said information according to the selection of the display option made in the menu structure of the user interface, in order to allow a user to toggle between the continuous length and the wrapped length.

11.   (previously presented) A method according to claim 10, wherein said information is displayed as alpha-numerical signs.

2

12.   (previously presented) A method according to claim 10, wherein said element, having a continuous length, is scrolled over said display.

13.   (previously presented) A method according to claim 10, wherein the item of a wrapped length, is adapted to fit a size of the display, by splitting the element into parts, each part fitting in a size of the display and feeding said parts in a vertical direction over said display, each time a length of the element is greater than the width of the display.

14.   (currently amended) A terminal for displaying information on a display, the information comprising elements, wherein an element is either provided with a continuous length presenting a length which is equal to or greater than a size of said display, or a wrapped length presenting a length which is less than a size of said display, said terminal comprising:

a display for displaying said information; and

a user interface provided with a displayed menu structure displayed on said display comprising a selectable continuous length item and a wrapped length item which are chosen from the display as display options, said items are arranged to display said information according to a selection of the display option made in the menu structure, in order to allow a user to toggle between the continuous length and the wrapped length.

15.   (previously presented) A terminal according to claim 14, wherein said information is alpha-numerical.

16.   (previously presented) A terminal according to claim 14, wherein said element, having a continuous length, is arranged to be scrolled over said display.

17.   (previously presented) A terminal according to claim 14, wherein the element, having a wrapped length, is arranged to split the element into parts, each part fitting in the size of the display and to feed said parts in a vertical direction over said display, each time a length of the element is greater than a width of the display.

18.   (currently amended) A terminal for displaying information on a display, said information comprising elements, wherein an element is either provided with a continuous length presenting a length which is equal to or greater than a size of said display, or a wrapped length presenting a length which is less than the size of said display, said terminal comprising:

a display for displaying said information and a display menu structure of items displayed on said display;

means for ~~setting~~ selecting a first type of elements to be displayed as a continuous length item and a second type of ~~element~~ elements to be displayed as a wrapped length item which are chosen from the display as display options of the displayed menu structure; and

~~means for identifying the first type of element when acting in a text to be displayed; and~~

means for displaying the first and second type of elements according to ~~an identification thereof~~ selection as a display option of the menu structure.

19.   (currently amended) A method according to claim 10 wherein:

4

the display displays the <u>displayed</u> menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input <u>choosing one of the display options</u> through the ~~interface~~ <u>display menu structure</u> indicating the selection of the continuous length item or said wrapped length item.

20.   (currently amended) A method according to claim 11 wherein:

the display displays the <u>displayed</u> menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input <u>choosing one of the display options</u> through the ~~interface~~ <u>display menu structure</u> indicating the selection of the continuous length item or said wrapped length item.

21.   (currently amended) A method according to claim 12 wherein:

the display displays the <u>displayed</u> menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input <u>choosing one of the display options</u> through the ~~interface~~ <u>display menu structure</u> indicating the selection of the continuous length item or said wrapped length item.

22.   (currently amended) A method according to claim 13 wherein:

the display displays the <u>displayed</u> menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input <u>choosing</u>

one of the display options through the ~~interface~~ display menu structure indicating the selection of the continuous length item or said wrapped length item.

23.   (currently amended) A terminal according to claim 14 wherein:

the display displays the displayed menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input choosing one of the display options through the ~~interface~~ display menu structure indicating the selection of the continuous length item or said wrapped length item.

24.   (currently amended) A terminal according to claim 15 wherein:

the display displays the displayed menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input choosing one of the display options through the ~~interface~~ display menu structure indicating the selection of the continuous length item or said wrapped length item.

25.   (currently amended) A terminal according to claim 16 wherein:

the display displays the displayed menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input choosing one of the display options through the ~~interface~~ display menu structure indicating the selection of the continuous length item or said wrapped length item.

26.   (currently amended) A terminal according to claim 17 wherein:

the display displays the <u>displayed</u> menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input <u>choosing one of the display options</u> through the ~~interface~~ <u>display menu structure</u> indicating the selection of the continuous length item or said wrapped length item.

27. (currently amended) A terminal in accordance with claim 18 wherein:

the display displays the <u>displayed</u> menu structure provided by the interface and a user selects from the display of the menu structure to have a display of said continuous length item or said wrapped length item by providing an input <u>choosing one of the display options</u> through the ~~interface~~ <u>display menu structure</u> indicating the selection of the continuous length item or said wrapped length item.
